PROFESSIONAL SUMMARY

Product Designer with 4 years in UX/UI, the last two on B2B SaaS across CRM, supply chain and wholesale operations. I design interfaces for mobile and desktop and prototype them in React, TypeScript and Next.js, including design systems. I work closely with business analysts and engineers and use AI as a development partner, reviewing its output critically.

CORE COMPETENCIES

Design Engineering | Design Systems & Component Libraries | React & TypeScript | Accessibility (axe-core) | UX Research & Prototyping | B2B Enterprise SaaS | AI-assisted Development | Design QA & Handoff

WORK EXPERIENCE

Cantu Inc

August 2026 - Present

Design Engineer

Brazil

- Sole maintainer of verum-lab, a reimplementation of the Atacado (wholesale) module of Verum Sales Global as a design system in code: shadcn/ui, Storybook (76 stories), business rules covered by unit tests (1,416 tests), and CI with accessibility and visual regression checks. 233 commits and 63 PRs.
- Translated business rules from Notion into tested code for the Opportunities and Payment Terminals modules, sending ambiguities back to the business analysts.
- Built a private shadcn registry (31 items) and a Notion-to-prototype pipeline, now used by two business analysts.
- Built a design-system Health & Maturity System (56 criteria, dashboard) on my own initiative.
- Audited 14 real product modules against the catalog: 31 inconsistencies found, 28 of 28 verified against the code confirmed, and 2 bugs found before they became tickets.
- Help Center for the VerumCenter systems: 54 flows mapped; guides ready for the Quotes, Service Orders, and Kanban modules.

Cantu Inc

November 2024 - August 2026

Product Designer

Brazil

- Product designer across B2B CRM, supply-chain and e-commerce products, including US/Mexico localization.
- Ran user research, designed and prototyped in Figma, and followed each feature through front-end validation with business analysts, back-end and front-end engineers.
- Delivered about 60 UX issues in Jira.
- Contributed to a component library built with shadcn, Tailwind and Ant Design, translating design decisions into scalable patterns for data-heavy interfaces.

Focus Monk

September 2023 - November 2024

UX/UI Designer

- Designed end-to-end UX for a productivity-focused application with the founding team: flows, information architecture, and visual system from the ground up.
- Delivered production-ready Figma components and interactive prototypes; responsible for research synthesis, interaction design, and usability testing.

Lize

April 2023 - August 2023

UX/UI Designer

Joinville, Brazil

- Contributed to a full redesign of the web and mobile platform across qualitative and quantitative research, A/B testing, and usability testing.
- Delivered redesigned flows for core user journeys, reducing onboarding friction and improving task completion across device types.

G'Seis Publicidade & Arroba Design

September 2020 - October 2021

Art Director

Balneario Camboriu, Brazil

- Visual identity creation and design principles (alignment, proximity, movement, space, balance). Tools: Photoshop, Illustrator, Premiere.

PROJECTS

Verum-Lab: Design System, Catalog & Governance Dashboard (Cantu Inc) Design System

Storybook as the single source of truth: 3-layer architecture (ui / patterns / modules), 76 stories, a private registry of 31 items, business rules unit-tested apart from the UI, 63 PRs. Health dashboard and two pipelines (Notion spec to HTML prototype from real components; catalog check for developers) with scores drawn only from collected evidence. In pilot; team starting to adopt, no adoption metrics yet. keyportfolio.vercel.app/work/ds-dashboard

Next.js, React 19, TypeScript, shadcn/ui, Tailwind CSS, Storybook, Vitest, Playwright

Verified Prototypes: AI Prototyping (recreated work) AI / Code

Specified and directed (built with Claude Code) a verifier for AI-made prototypes that follow the design system and report what they could not check: each item is verified, blocked or not verified. Recreation with fictional data; no pilot run yet. keyportfolio.vercel.app/work/verified-prototypes. Code: github.com/theuxkey-cpu/portfolio-in-code

React, TypeScript, Claude Code

Help Center: Support and AI (recreated work) Product Design

Product design case on cutting how-to tickets by putting help where the question starts. Mapped ~50 flows across 5 modules, wrote the knowledge base the assistant uses, and designed the assistant to say it does not know on critical data such as prices. Did not build the assistant. Fictional data; no user testing yet. keyportfolio.vercel.app/work/help-center. Code: github.com/theuxkey-cpu/portfolio-in-code

React, TypeScript

EDUCATION

Postgraduate Degree, UX Engineer (in progress) PUC Minas — Aug 2026 - Dec 2027

MBA in UX Research, Research Operations and Design Leadership UNIFATEC — 2023 - 2024

Bachelor's Degree in Advertising and Marketing UNIASSELVI — 2015 - 2018

SKILLS

Product Design: UX Research, Usability Testing, Interaction Design, Information Architecture, High-Fidelity UI, Interactive Prototyping, Design QA & Handoff, Figma, FigJam, Framer (basic)

Design Engineering: Design Systems, React, TypeScript, Component APIs, Design Tokens, Container Queries

Engineering: Next.js, Tailwind CSS, shadcn/ui, Base UI, Radix UI, Ant Design, Storybook, Vitest, GitHub, Supabase, Vercel

Quality: Accessibility (WCAG), Automated a11y (axe-core), Reduced Motion

AI & Workflow: Claude Code, MCP, Claude, ChatGPT, Gemini, Perplexity, NotebookLM, Agile, Scrum, Kanban

Languages: Portuguese (Native), English (C1 Advanced)
